## Projecturf launches online project management software

Posted by Dennis Sellers Jun 4, 2009 at 10:00pm

Projecturf, a provider of on-

demand project and collaboration management software, has launched Projecturf, a scalable, web-based project management tool with unlimited storage space that's browser, platform and database independent.

Projecturf was specifically designed to support the project management needs of design firms and developers, according to CEO Chuck Pearson. The task tracking software allows developers to define initiatives and projects, automate processes, and distribute data through a secure, stylish, intuitive and easy-to-use online environment with almost no learning curve, he adds.

Projecturf doesn't require complicated software to be installed or a large in-house IT department to manage and upgrade, Pearson says. Project management features and benefits for all Projecturf plans include: unlimited storage on all plans; customizable design; a workflow with three levels of system permissions: Administrator, Project Manager(s), User(s); permission-based file sharing; the ability to manage project milestones and tasks up-to-the-minute with Project Completion Reports and dynamic Gantt charts.

All three Projecturf plans allow unlimited users and include all features as well as a 30-day free trial. Projecturf's Start-Up Plan is US\$29.99 per month and lets you manage up to 15 projects. The Business Plan is \$59.99 per month and lets you manage up to 40 projects. The Enterprise Plan is \$159.99 per month for unlimited projects.
